WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/FI 2005/000029

Bo	x No. I	Basis of this opinion
1.	which it	gard to the language, this opinion has been established on the basis of the international application in the language in twas filed, unless otherwise indicated under this item.
	_	This opinion has been established on the basis of a translation from the original language into the following language, which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).
2.	ciaimed	gard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the invention, this opinion has been established on the basis of:
	a typę	of material a sequence listing
		table(s) related to the sequence listing
	b. forma	t of material
	E	in written format in computer readable form
	c. time	of filing/firmishing
		contained in the international application as filed.
		filed together with the international application in computer readable form.
		furnished subsequently to this Authority for the purposes of search.
3.		In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/FI 2005/000029

. Statement			
Novelty (N)	Claims	1-6	YE
	Claims		NO NO
Inventive step (IS)	Claims	1-6	YES
	Claims		NO NO
Industrial applicability (IA)	Claims	1-6	YES
	Claims		NO

2. Citations and explanations:

The invention relates to an auxiliary contact configuration for a switching device comprising two auxiliary contact positions situated near one another. The object of the invention is to influence the manner in which the auxiliary contact changes its position between the first and the second switching position when the auxiliary contact control device is moved.

Documents cited in the International Search Report:

D1: DE 19860042 A1

D2: US 2002/0117387 A1

D3: US 2002/0112946 A1

D4: DE 4023655 A1

D5: US 5107236 A.

The cited documents represent the general state of the art. The invention defined in claims 1-6 is not disclosed by any of these documents.

The cited prior art does not give any indication that would lead a person skilled in the art to the claimed auxiliary contact configuration for a switching device. Therefore, the claimed invention is not obvious to a person skilled in the art.

Accordingly, the invention defined in claims 1-6 is novel and is considered to involve an inventive step. The invention is industrially applicable.
